DETAILED ACTION

EXAMINER'S AMENDMENT

1. The application has been amended as follows:

With regards to claim 14:

- In the fourth line of claim 14 delete "on cap" and insert --on a cap--
- In the fourth line of claim 14 delete "one other" and insert --one another--

With regards to claim 15:

- In the first line of claim 15 delete "method" and insert --stroller--

Election/Restrictions

2. Claims 1-31, 33, and 38-44 are allowable. The restriction requirement as set forth in the Office action mailed on the 12th of May 2008, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 4-5, 8-10, 13-24, and 39-42 directed to the alternate species are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

3. Claims 1-31, 33, and 38-44 are allowed.

The best art found is Redmond et al. (US 4,805,938) which disclose most of applicant's claimed subject matter except that is explained below in reference to each independent claim.

With regards to independent claims 1 and 43:

- The claim language that makes these claims allowable over the prior art found at this time is the combination of the first and second wheel spans being different then one another and being capable of being aligned in such a manner that the first and second axle portions become aligned or the alignment of the front wheels of the second stroller aligned with the rear wheels of the first stroller when the strollers are arranged in tandem. Therefore claims 1 and 43 and their dependents are found to contain allowable subject matter.

With regards to independent claim 44:

- The claim language that makes these claims allowable over the prior art found at this time is the combination of the front wheel of a second stroller portion and the rear wheel of a first stroller portion and each having a different lateral position and are capable of being aligned laterally with one another when arranged in a

Art Unit: 3618

tandem relationship. Therefore claim 44 and its dependents are found to be allowable.
